

ALBANIA

Disaster Risk Reduction

Creation of a National Operations Centre for Civil Emergencies within the Albanian National Civil Protection Agency

This project aims at **establishing and launching a Civil Emergency Center to manage all kind of natural and man-made disasters in Albania**, ensuring coordination between different local and national stakeholders, supporting technical training courses for officials, operators and local communities affected by natural disasters.

11 SUSTAINABLE CITIES AND COMMUNITIES

BUDGET **1.000.000,00 Euro**

IMPLEMENTING PARTNER

OTHER PARTNERS

Albanian Agency for Civil Protection (AKMC)
Italian Department for Civil Protection (DPC)

DURATION **36 months**

AREAS OF INTERVENTION **Albania**

CHANNEL **Direct management**

BENEFICIARIES **Albanian Agency for Civil Protection (AKMC)
Local communities, families and people affected by disastrous events**

EXPECTED RESULTS

- Establishment of a National Civil Protection Operations Center and an operations room to perform preventive and post-disaster monitoring activities, as well as activating the disaster relief chain;
- Training for 30 Albanian Civil Protection managers on agency management and crisis situations;
- Training for 19 operations room staff and technical assistance for operations room staff;
- Support in the implementation of the SeisMec software for earthquake detection;
- Improved governance of the AKMC, with staff specialized in monitoring and service management.

November 5, 2024 - Certificates of participation in the training courses for Albanian Civil Protection experts were awarded, in the presence of Department Head Fabio Ciciliano
