

PRO BIO

Promoting local biodiversity through innovative natural actions in the agri-food sector in Bosnia and Herzegovina

The project aims to strengthen the capacity and knowledge of local institutions to adopt a European regulatory framework for **standardized, safe, and environmentally friendly production of local varieties** within the fruit, vegetable, and cereal supply chains.

The goal is to **introduce innovation into Bosnia and Herzegovina's agri-food sector** and increase its resilience to climate change, reduce biodiversity loss, and promote sustainable agricultural practices and the valorization of local products and culture.

May 27, 2025: Project launch ceremony in Jahorina, with a large participation of local and Italian stakeholders
