

Antigonea and Benjë

Developing community resources through the valorization of cultural and natural heritage

The project aims at **supporting Albanian Institutions responsible for the protection of cultural heritage**, in order to preserve it and enhance it, offering a model of sustainable socio-economic development to the local communities, living close to the archaeological sites and in the traditional villages.

EXPECTED RESULTS

1. Increased usability and accessibility of the **archaeological site of Antigonea**;
2. Increased usability and accessibility of the **traditional village of Benje (Permet)**;
3. Increased the management and operational capacity of the institutions responsible for **protecting and promoting the country's cultural heritage**.
